-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 30-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There are no clear antecedent bases in the claims for "the brake system" of line 1 of each of the claims 30-31 and "the desired heading" of claim 31, line 6.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. The examiner suggests that applicant review the exceeding broad scope of at least claims 1, 21, 30 and 31. For example, claims 30-31 seem to claim the conventional. During a turn or cornering, individual brakes are normally adjusted (hold, increase, decrease fluid brake pressure) based upon various parameters such as speed and slip. One having ordinary skill in the art recognizes that adjusting braking during cornering by speed difference alone is not the most efficient method of brake control

unless conditions and/or situations such as oversteer, understeer, steering angle, slip, etc., are calculated and/or estimated with the ~~V~~^eSE unit adjusted accordingly.

5. Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Poggenburg (6523914).

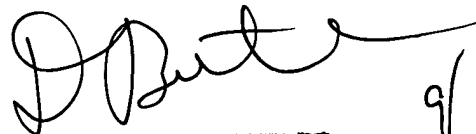

6. Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Batistic et al (6012010) or Katayose et al (6027183) or JP 6-64515 to Sano.

Note fuzzy logic of Sano providing for independent brake pressure control.

7. Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Eckert et al (5774821) or Klatt (3918766) or Giers (4844557) or Yoshioka et al (6089680).

8. Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Ogino (6026343).
